**Description:** (2) Perennial fruit trees, (4) bushes, (10) climbing edibles with trellis, ground cover crop nitrogen fixer from seed, organic soil, (30lbs) biodynamic compost. This Food Forest has: Pomete, passion fruit vine, citris, artechoke, strawberry, blueberry, leeks, and the list goes on...

**Options:** Have food forest surrounding a relaxing hang out, meditation area, another theme. Plants love water and the sound of it. Consider creek. waterfall, and or pond near or surrounding Food Forest.

Mimicking nature in our designs. See Native Forest (reforestation) here on menu.**Note:** Density of planting can effect food forest pricing. All installations require design, locating all plants. See design menu.

Requires five hours of direct sun light in summer.

# Fruit Trees

**Name:** Fruit Trees

**Price:** \$300.00 - \$1,150.00 5gal non fruiting to 24" boxed and fruiting

**Menu #:** D4

**Quantity:**

**Maintenance:** Mulching two times per year

**Water:** Deep watering two to three times per week

**Prefab:** No

**Description:** Choose from avocado, apple, fig, pomegranate, citrus, guava, sapote, apple, kumquat, olive, cherrimoya, pear. Trees are planted with biodynamic compost, topsoil ½ mixed with native soil. We take great care and time in our planting using professional techniques to ensure long lasting fruitful results. Delivery included. Location on property can alter pricing.

**Options:** Food Forest are highly recommended. Fruit trees and all plants love company. This strengthens the immune system of the all the plants

in the community. Trees planted alone have a hard time surviving in their younger years. They do much better with company, as they do in nature.

**Note:** We only guarantee plants, planted in plant guilds (families) from our designs with proper composting, fertilizer, irrigation, and companion planting.

Siugar Bush

**Water:** Weekly

**Work hours:** 5.0 – 6.0 days. Crew of 3 pending on size of project and materials selected \$10,000.00 + materials “estimate”

# Living Garden Table

**Name:** Living Garden Table

**Price:** \$23,000.00 - \$33,000.00

**Description:** Combining nature, art, and technology into one piece that complete the formal edible garden. Relying on skilled technicians, custom craftsman, and precision technology, we bring you quality crafted architecture. Legs are from solid eucalyptus, or other local wood drilled for irrigation, and protected with a life time guaranteed sealant penetrator. The table is constructed with slate, and or copper, iron with custom trays for vegetables, and herbs growing from right off the top. There is a mini trough creek running strait through the center, creating a waterfall affect, circulating back up through table legs, completing a unique table that make outdoor dining something to really talk about. This project needs to be designed for each custom installation including irrigation locations and source, exact size width, height, length, number of plant trays, water drainage from plants, specific materials preferred, colors, scents of plants, material colors (weathering affects), floor materials and maintenance. One can literally cut their salad and herbs

**right there growing from the Living Garden Table. Seats sixteen people.**

**Menu #: E16**

**Link to video:** (24) Dani's River Rock Wall - YouTube

# Garden Room Malibu Retreat

**Name:** Garden Room Malibu Retreat

**Price:** \$12,500 Per S.F. Face Wall

**Description:** Includes reclaimed eucalyptus wood, bench, two entrances. We call this “un-carpentry” because when using curved wood, every cut is angled. This adds challenge and time to the work, This room here required the removal of a eucalyptus tree, transport, and 5 weeks of construction involving a crew of six, full and part time. It's held together with heavy duty screws, 3” to 6” long, bolts on the corners. The wood is permanently sealed with Aqua Protect (a penetrator) that petrifies the wood. It had life time guaranty. Pieces are sealed prior to construction so every crevice is sealed. Definitely art in the making. No two garden rooms are the same. Built to last.

**Menu #:** E19

**Quantity:** ...

**Maintenance:** Sealed oiled 2x's yearly

**Water:**

**Prefab:** No

**Work hours:** 120hrs. Per week crew of 3 to 6.

**Options:**

**Note:** Price can vary depending on reclaimed wood and tree surgery removal involved to make the project possible.

**Link:** [...](#)

# Topanga Tommy Teeple Steps

**Name:** Topanga Tommy Teeple (14) Steps

**Price:** \$8,700.00

**Description:** Includes reclaimed oak slabs, and oak railings. We call this “uncarpentry” because when using curved wood, every cut is angled. This adds challenge and time to the work, . # Consultations Designs & Surveys

# Garden Coaching Consultation

**Name:** Garden Coaching Consultation

**Price:** \$350.00

**Menu #:** G1

**Description:**

**Note:** This consultation is a general overview of all content listed. We spend two or three minutes on each subject.

**Important:** You are welcome to have us focus on one area or another. Please inform us of this prior to the meeting.

**Preparation for Gardening Coaching Consultation:**

**Determine where meeting will be, Physically in person or via internet, zoom or other platform.**

**1) Look through pictures, menu's, on our website and see if there is anything there specific you would like to have incorporated on your property and perhaps onto your theme drawing. Email us the file name at the bottom of the picture.**

**2) Provide any pictures and or concepts/ideas you may have from the internet (links), books, magazines, scans, Pinterest etc.**

**3) Take a look at our [Create a Food Forest at Home](#). Email us your interest.**

**4) Check out [www.Alivewater.net](http://www.Alivewater.net) to understand a little bit about recommended water technology mimicking nature. Bottled water gone forever!**

**There's a lot of info we will share with in a short time. The goal is to get a general idea of your property-**

**theme drawing. From the theme drawing, we start with a chosen installation, one phase at a time.**

**We recommend you start small and that you will be interactively involved with your Edible Landscape learning what works best on your own property as far as maintenance, climate conditions, family involvement, and future installations.**

**Consultation is \$350 and Includes:**

- **Site visit**
- **Recommendations for appropriate garden project setting, size, design, and materials based on client's needs**
- **60 page consultation booklet**

**Consultation booklet includes:**

- **The importance of a plan and a design**
- **Vegetable garden standards designs/surveys/drawings and books**
- **Secrets of the soil, mulch and organic fertilizers**
- **Where to purchase your plants**
- **Vegetable yield**
- **When to plant certain vegetables-planting calendar.**
- **What you can start from seed**
- **When you can grow what**
- **Hardscape-what materials will you build your garden from?**
- **Animal and pest/disease control**
- **Maintenance-weekly, monthly...**
- **Water-how to water your garden with "living" water**
- **Irrigation options**
- **Resources-recommended installers, recycled materials, nurseries and**
- **Typical pit falls of the beginner**

**A 60 page booklet covering all of the above topics is provided to you via an on-line link.**

# Permaculture Consultation

**Always keep the big  
picture in mind!**

**Title:** Permaculture Consultation

**Price:** \$777.00 additional professionals ad in \$250.00 per professional-strongly suggested

**Name:** Permaculture Consultation

**Price:** \$777.00

**Menu #:** G2

**Description:** This is a survey of your vision, specifications, property data collection, history of property, neighbors, potential permits, multiple mind input, and many important details to consider as a starting point. There are many critical questions when considering an over all instllation. This meeting can be lengthy pending on the detail, & scope you give to your potential project.

**The Permaculture consultation:**

1. An over view of what permaculture is “The practice of sustainable human habitats by following nature's patterns”
2. Permaculture Design case Study
3. Reading The Landscape:
4. Suggestions

# Property Survey

**Name:** Survey

**Price:** \$1,500.00 +

**Description:** Measuring survey property, and or portion of property. Elevations can be taken also for water run off. Water source, electrical, compost, trash, communications, existing irrigation located. Theme Concepts drawing, landscape design, irrigation design locations, hardscape design, water retention/flow design, all follow survey.

**Menu #:** G3

**Quantity:**

**Maintenance:**

**Water:**

**Prefab:**

**Work hours:** 60hrs. + or – 1 week

**Options:** Google maps can some times be used for your survey.

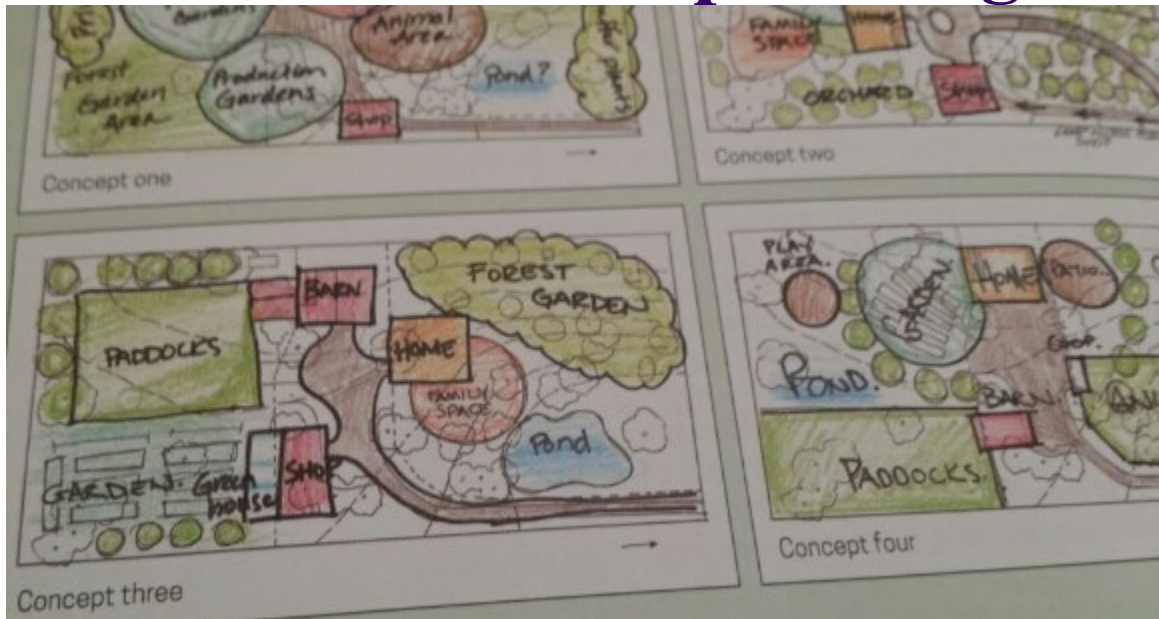

**Note:** Surveys can vary in price, based mostly on detail . Visits to the property may be necessary through out the survey creation. Surveys can greatly vary in price pending on detail. A simple rectangular yard can

**take minutes to measure. However when trees, play sets, sheds, fountains, exist, then there is more to measure.**

# Theme & Concepts Design

**Name:** Theme and Concepts Design

**Price:** \$1.290.00 +

**Description:** Theme drawing follows the survey or rough sketch of property. We have over 100 specific property items to choose from i.e. ponds, raised vegetable beds, food forests, scented forest, color themes, wind brakes, privacy, native planting, meditation rooms, living walls/roofs, and so on....

These items are listed and or placed on the Theme Concept Design Drawing roughly locating them in their potential positions. You may select maybe 10 items from this all important list that has been accrued over the the past 20 yrs, that we are continuously adding to. This is the client's opportunity to include from their wish list items of importance that left out could alter the entire design added in later. This drawing is part of thoroughly thinking through the over all installation, at the critical beginning phase. It is the beginning phase, and the foundation of the new design installation.

# Water Flow & Retention Design

**Name:** Water Flow & Retention Design

**Price:** \$750.00 +

**Description:** Designing property elevations, taking water to catchment and retention absorbing water onto the property, rather than taking water away from property. This helps everything on the property flourish since water is what makes everything grow. Dry and wet creek beds, water falls, french drains, wine barrels, swales, terrises, and the like, help to keep water on property and prevent water run off. Water flow examined, documented and designed.

# Plant & Hardscape Design

**Name:** Plant and landscape Design

**Price:** \$2,500.00 +

**Description:** Taking menu and or custom request pre-budgeted, and estimated selections from client, and creating plant and hardscape design. Each plant and hardscape is mapped numerically to legend. Drawings and designs are co-consented by designer and client, followed, and referred to through out the project. They anchor the project. Please read our project classifications stressing the importance of the design and following it. Within our project classifications are other options i.e. hourly rates with no design drawing. However, we are to be paid for

deconstruction, reconstruction should this occur if you decide to opt out on designs. From our experience, drawing designs play a critical role in a smooth running installation. We believe working without drawings is rolling the dice with everyone's energy.

# **Maintenance & Care**

# Fruit Tree Biodynamic Injection

**Price: \$1,027.00**

**Menu #: H1**

**Description:** 10 Fruit tree injections. With a bar, we create drill 1" holes 12" - 18" deep down into the roots of trees. We then insert compost and tea into the holes helping the tree receive nutrients. The result has always been astoundingly successful giving some times immediate buds, and fruit to trees that have "never" given fruit like the orange tree in the picture. Please request for references.

**Quantity: 10 fruit trees**

**Materials:** *70lbs Biodynamic Soil, 12oz. Super Thrive, 16oz. Kelp powder, mulch*

**\$135.00 Biodynamic Soil**

**\$14.00 Super Thrive**

**\$18.00 Kelp powder**

**\$210.00 (14) bags mulch on each tree, bagged or bulk**

**\$150.00 - \$250.00 pick up and deliveries**

**Maintenance:** *Yearly mulch and tea only*

**Water:** *On timer 2x's per week pending on season*

**Work hours:** *16hrs (2) workers (1) day*

**\$500.00**

**Note:** *We will make a (5) 5gal teas to pour over each tree when through at end of day. Each tea will have included: biodynamic compost, super thrive and kelp, to help boost immunity of each tree.*

# Tree Transplanting

**Name:** Tree Transplant

**Price:** \$4,500.00

**Description:** “Undisturbed” root system transplant 40” ball larger or smaller. Transplanting is a skilled delicate process. We carefully trench around the tree, then weave burlap around it holding it tight preventing cracking of the ball. We replant the tree with  $\frac{1}{2}$  native soil,  $\frac{1}{2}$  top soil and 351lbs bio dynamic soil.

**Menu #:** H2

**Quantity:**

**Maintenance:** Watering

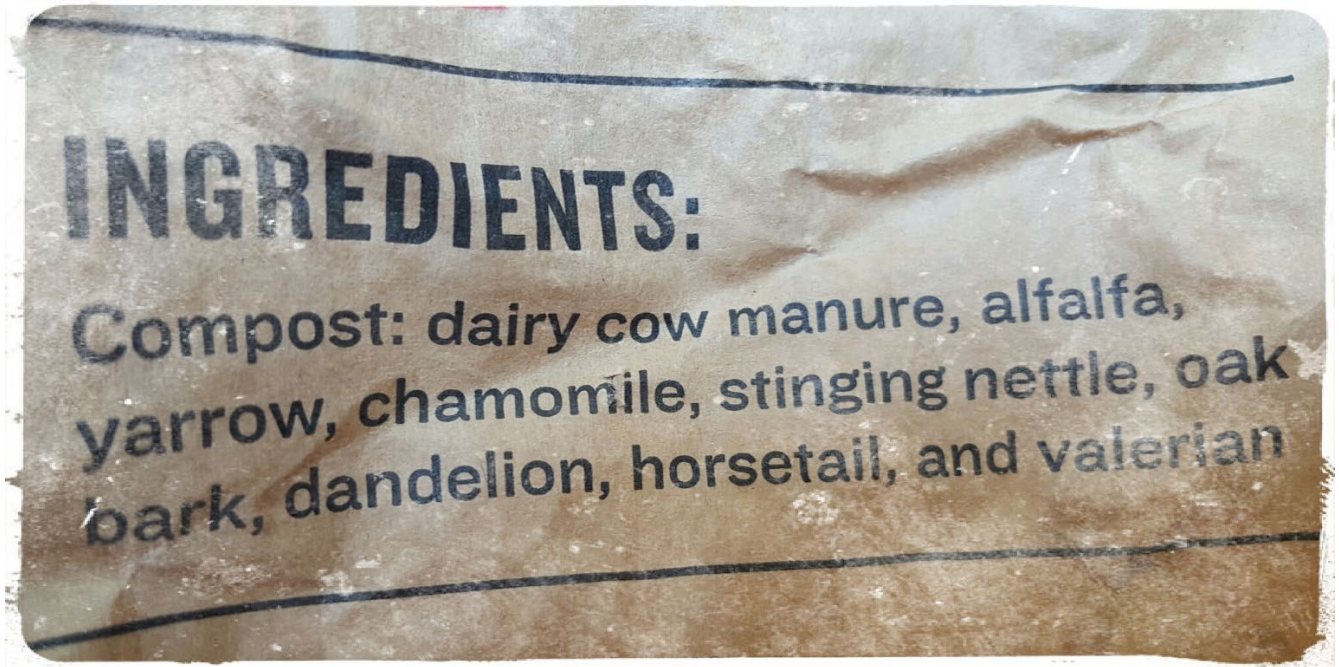

**Water:** On timer 2x's per week pending on season

**Work hours:** 150hrs (3 - 6) workers (5) days

# Biodynamic Compost

**Name:** Biodynamic Compost

**Price:** \$90.00 \$35/lb bag

**Description:**

**Menu #:** H3

**Quantity:**

**Maintenance:**

# Soil, organic mix, mulch

**Name:** Soil, standard compost - seed topper, mulch

**Price:** \$275.00 - \$350.00 per cubic yard delivered

**Description:**

**Menu #:** H4

**Quantity:**

**Maintenance:**

**Water:**

**Work hours:**

**Note:** Prices vary from location to location and amount purchased. (3) yrd. Minimum delivery

**Work hours:** 2 weeks

**Options:** We can build it using recycled Douglas fir

# Maintenance & Harvesting

**Name: Maintenance & Harvesting**

**Price: \$600/Month**

**Description Typical Maintenance:**

- 1) Mulch 2-3x's/yr
- 2) Water every 3 days "deep soaking" to roots with wand-more in summer 4 days/wk
- 3) use shower nozzle wand for watering
- 4) Clip greens from the outside
- 5) Fertilize 2x's/yr.
- 6) Diatomaceous earth sprinkled
- 7) Linseed oil application on wood where necessary
- 8) Possible sun filter canopy above garden during hot summer if exposed to direct sun light and temperatures above 95 degrees

**More detailed list included with consultation**

**Menu #: H5**

**Note: Prices vary from location to location, travel time, & size of garden**

**Work hours: 1.5 hr. per visit**

# Raw Living Vegan Culinary

**Heaven Balls**

**Name:** Raw Living Gourmet Food Prep

**Price:** \$100.00/ hr per chef \$800 per day per chef

**Description:** Garden to table. Collecting as much as possible from the garden. Variety of dishes, Avaghetti, salads, heaven balls, desserts, smoothies, mach tuna, proteins, cultured vegetables, herbal sun teas, appetizers, juicing, and all kinds of creative dishes

**Menu #:** J1

**Note:** Prices vary from location to location and amount purchased. Minimum ½ day \$400.00 per chef unless we are gardening on site. Price will then be established.

# **‘Live’ Garden Party Music**

# Your Brain On Nature

## Eco-therapy

**“Of all the paths you take in life  
make sure that some of them are dirt”**

**John Muir**

*It's been over 25yrs now since the birth  
of Edible Landscape*

*Nature has become a rock in my life,  
never deviating and always there for  
me in my good times & not. Healing,  
rejuvenating, & comforting*

*As a service to you, I, Tommy & we offer  
shared activity in nature.*

## **“Nature Immersion”**

**Name: Nature Immersion – Your Brain On Nature**

**Price: \$250.00/hr - \$400.00 ½ day**

**Description: Connecting with nature**

**Menu #: J1**

**Research shows that to actually show one cares about nature, one must have actually be exposed to it. Natural environments offer unbelievable benefits for our health.**

**Choose from:**

- 1. Gardening**
- 2. Forest hike - Vitamin G**
- 3. Natural fire hangout**

4. Natural site seeing, permaculture sites
5. Outdoor education, sharing recommended reading, work books
6. Outdoor uninterrupted listening
7. Beach with outdoor play
8. Wilderness activity - bare foot hiking, earthing, journaling in nature
9. Music in nature
10. Creativity in nature. Let it come through. All of us are creative
11. Discussion & direction on outdoor careers
12. Study of local natural plants
13. Awareness - Study of the harmful affects of modern living, technology, current day
14. Natural building, working with cob for example
15. Discussion on societal current day status. Solutions on how to heal from it, and positive ways to overcome the impossible
16. Relationship University, Quantum Hitch-hiker, & other documentation. Literature written & shared by Tommy
17. Book recommendations. These naturally come up on nature excursions and sessions
18. Outdoor workouts
19. Eventually become immersed in nature yourself helping others along the way, like I do now.
20. Rock hopping
21. Incorporating walking into one's life
22. Forest air bathing
23. Wilderness therapies
24. Indoor plants & water features
25. FUN

The goal is to assist interested individuals in crossing the bridge from the modern world back to the natural world. I ,Tommy am here to help you cross that bridge with baby steps, then eventually, you can walk on your own. Then you will guide others across this bridge.

We, together, will create a more natural life style.

*“Nature is always lovely, invincible, glad, whatever is done and suffered by her creatures. All scars she heals, whether in rocks or water or sky or hearts.”*

*John Muir*

*Painting From Larry, Tommy's Mechanic*

Gratitude & inspirational thank you's to Robert G. Becker,  
permaculture villages/movements, & all the Edible Landscape  
clients over the past three decades

**Thank you for your wonderful visit.**  
Wishing you, nothing but your natural dreams come true....

Let all life's beautiful gifts, come to, and through you  
effortlessly..

In **God Given** Nature, *Tommy Teeple*
